KEVAL VINOD CHHEDA

EDUCATION

Mumbai University (Santacruz, India)
Master of Science in Computer Application

K. J. Somaiya College of Science & Commerce (Mumbai, India)
Bachelor of Science in Computer Science

PROFESSTIONAL SUMMARY

Java Backend Full Stack Developer with 5+ years of experience building scalable microservices and enterprise applications in BFSI and Supply Chain Logistics domains. Strong expertise in Core Java, Spring Boot, Microservices, Angular, and Oracle/PostgreSQL databases with hands-on experience developing both **backend services and Angular-based frontend modules**. Experienced in working with 95+ microservices, REST APIs, OAuth2 security, and enterprise deployments on Linux servers. Certified in **Azure and AWS fundamentals**, with strong focus on performance, reliability, and enterprise-grade system design.

TECHNICAL SKILLS

- **Language**: Java, SQL, JavaScript, Typescript.
- **Backend:** Spring Boot, Spring Framework, Spring JPA, Hibernate, REST APIs, Microservices
- **Frontend:** Angular 10, React 16, HTML, CSS, Bootstrap
- **Database Language:** PostgreSQL, Oracle SQL, MySQL.
- **Software Tools**: Git, SVN, Postman, SonarQube, Eclipse, STS, VS Code, Putty, WinSCP
- **Cloud Technology**: Azure (AZ-900, AI-900 Certified), AWS (CLF-C01 Certified), GCP (CDL).
- **Concepts:** Microservices, REST, OAuth2, Spring Security, Agile, SQL optimization, Production support

WORK EXPERIENCE

Accenture (Senior Analyst - Java Full Stack Developer) – Mumbai, India (Sep 2024 - Present)

- Contributing to the FedEx Supply Chain & Logistics platform, working across an ecosystem of **95+ Spring Boot microservices** supporting shipment processing, tracking, routing, and logistics operations. Developing and maintaining microservices using Core Java, Spring Boot, and REST APIs.
- Implementing **customer-funded, roadmap features and enhancements**, ensuring alignment with business requirements and system architecture standards. Collaborating with distributed teams to enhance scalability, performance, and reliability of services.
- Driving **Non-Functional Requirement (NFR) improvements**, including performance optimization, SQL tuning, and reliability enhancements for Oracle-based transactional systems.
- **Performing production support, root cause analysis, and defect resolution**, improving service stability and reducing recurring incidents.
- Working with Angular frontend teams for API integration and end-to-end feature delivery.

INFRASOFT TECHNOLOGIES LTD (Associate Consultant – JAVA Full Stack Developer) Mumbai, India (Jun 2023 - Present)

- Designed and implemented standalone Spring Boot applications **ASBA, SSY, PPF, Fund Transfer, Gold Bond** in BFSI Domain.
- Developed CBS Adaptor for Financial **transaction API UPI, Block Amount feature** in XML data exchange format.
- Created and managed database tables using Oracle SQL with SQL Developer and SQL dbx tools.
- Utilized Java, Spring Boot, Angular for UI and backend development, ensuring high performance and scalability of applications.
- Collaborated closely with PSB Bank Client, providing technical guidance, delivering solutions that meet their needs.
- Implemented SVN for streamlined version control, managing multiple branches efficiently across DEV and UAT environments, reduced
- code conflicts by 40% and enhanced deployment accuracy by 25%. Maintained Quality Checks with **SonarQube Report**.
- Used Putty and WinSCP for jar deployment in Linux server, ensuring smooth and efficient application deployment in DEV environment.

Capgemini Technology India Ltd (Software Engineer - JAVA, React JS Developer) Mumbai, India (Mar 2021 -Jun 2023)

- Worked as a Java Full stack Web Developer in Contract Data Portal and supplier Portal with Spring framework version 5.0.4 and ReactJS version 16 for Action Nederland Retail Domain.
- Administration of database in PostgreSQL using pgAdmin4 Tool.
- Leveraged Spring Cloud for service discovery and configuration management for Microservice based architecture.
- Implemented security measures, including authentication and authorization, using Spring Security and OAuth2.
- Responsible for End-to-End Java Backend Development and Incidents in Contract Data Portal. Performed unit testing with **Junit** and
- **Mockito Framework** to improve code quality and bug detection and Jasmine for functional component in ReactJS.
- Managed version control with GitHub, handling branches for different environments (DEV, QAS).

TECHNICAL COURSES AND CERTIFICATIONS

- Machine Learning for Trading from Coursera.
- Artificial Intelligence Fundamentals AI-900.
- Passed Exam AZ-900: Microsoft Azure Fundamentals.
- Automation Engineer Practitioner RPA.
- Certified: Java Hacker rank (Basic).
- Udemy Ultimate AWS Certified Developer Associate.
